

THE AI-POWERED LAYER-1

LITEPAPER

THE BLOCKCHAIN POWERED
BY ARTIFICIAL INTELLIGENCE

WELCOME TO MIAMI

MACHINE LEARNING MADE DEGEN

Welcome to the creative flow state blockchain - a home for vibrant **Memecoins**, creative media, and engaging games. Miami Network, known simply as Miami, is a powerful, fast, and efficient EVM compatible blockchain. Here, our deep learning (DL) algorithms increase the efficiency of all your apps. Oh, and did we mention BRC-20 interoperability?

DREAM-FUELED BLOCKCHAIN PARADISE

AI CHAIN. TURBOCHARGED.

Miami Network: The lightning-fast, supercharged EVM blockchain powered by Deep Learning, ensuring minimal gas fees and fast transactions.

ATTRACTING MEMES AND MEDIA

Miami Network connects and empowers communities. From vibrant Memecoins, to creative gaming apps and more.

NEURO FORGE

An open-source juggernaut with state-of-the-art AI to annihilate gas fees and obliterate transaction times.

DREAM-FUELED CONTINUED

BRC-20 INTEGRATION

Seamless interoperability with BRC-20 standards, Miami provides a flexible and robust framework for diverse crypto operations, ensuring scalability.

BLENDING VIRTUAL AND REALITY

Miami Network allows for easy AR & gaming smart contract deployment. Miami's fast throughput helps virtual landscapes craft seamless blockchain immersive experiences.

THE MAGIC MIAMI ECOSYSTEM

Introducing a few of the projects premiering on Miami.

\$BLAZE

The gaming hub fixing the broken Web3 gaming ecosystem. For players and publishers.

BLAZE

GRAND THEFT AUTISM \$GTA

The memetic adventures of 24-year old HODLer who still lives at home with his mom and stepdad.

\$STACY

Plump lips, large... assets, and a fetish for memecoin moonboys. Every crypto bro's dream.

\$PABLO

Miami's sunsets and nightlife are fueled by one thing... and Pablo makes it happen.

MANY FULLY PLAYABLE GAMES

IN THE PIPELINE, READY FOR PLAYERS

MIAMI VIBE

MIAMIVIBE.ORG

BEHIND THE SCENES

In this litepaper, we will explore the potential benefits of connecting AI with Blockchain tech and the bonuses it can offer to various industries. Miami's deep learning algorithms make our transactions faster, smoother, and safer. However there are many other benefits to MRC-20 (ERC-20), from BRC-20 interoperability, to creating smoother experiences for Gaming and SocialFi dApps. And the best part? To a user these things are fully seamless and smooth. No annoying tasks, no crazy wallet systems. Keep your Metamask. Keep your keys.

UNLEASHING THE POWER OF REAL AI: ALGORITHMS DESIGNED TO HELP ARTISTS, CREATORS, AND METAVERSE EXPLORERS

Miami AI Network is not just another buzzword-filled promise of AI. We go beyond simplistic chatbots or search engines. Our AI technology leverages machine learning algorithms and large data sets to create optimized decision-making models that outperform human efficiency. These mathematical models are meticulously coded, trained, and optimized to deliver results far more efficiently than humans ever could.

While Miami Network is designed to serve artistic and creative explorers on chain, it is also powered by a cutting-edge algorithmic system that has been created and fine-tuned by our team of data scientists. As with any strong AI, the training of our models continues. We firmly believe in the power of professional math to create a truly professional-grade blockchain experience.

BENEFITS

WHY AI INTEGRATION?

SMARTER WITH A.I

A.I. automates many of the optimization, efficiency, and accuracy tasks. Faster, more efficient, better decisions.

TRANSPARENCY

Record-keeping is transparent and auditable, as all transactions are recorded and visible to all parties involved. By incorporating AI, transactions can be analyzed in real-time, leading to automated detection and prevention of fraudulent activities.

EFFICIENCY

We eliminate intermediaries. This results in faster transaction processing and reduced costs. AI enables automation of various processes, further enhancing efficiency. This creates new opportunities for growth and innovation.

DECENTRALIZATION

No single entity controls the network. This allows greater privacy and security and eliminates single points of failure.

COMING TO MIAMI IS FAST AND EASY

1 CLICK ONBOARDING

Just connect Metamask to Miami's RPCs. Welcome to the adventure.

1

A COMMON LANGUAGE

Miami is Fully EVM Compatible using Solidity.

2

VIBRANT, LIKE MIAMI

Web3 creatives, artists, and gamers have a new home.

3

EMPOWERING BLOCKCHAIN PIONEERS

AI UNCHAINED

ALREADY LIVE

The Miami Network is more than a promise; it's a fully functional reality. With a robust TestNet available now, we are operational & pioneering the future of blockchains, today.

EXPERTLY CRAFTED

A high-octane algorithmic system that helps fuel the creative explorers and memecoin degens.

MACHINE LEARNING ON STEROIDS

Optimized decision-making models, meticulously coded and trained to outpace other chains.

EVOLVING INTELLIGENCE

Relentlessly training our models, we're convinced that professional math is the key to a blazing-fast blockchain experience.

FEATURES SUMMARY

STICK WITH SOLIDITY

Re-deploy your smart contracts in seconds. No code changes needed.

HIGH OCTANE SPEED

Fast throughput, low latency block timing, and efficient transactions with lower gas.

REAL AI, REAL IMPACT

Math and Machine Learning empowers users to degen faster. No BS.

SCALE

With high throughput, your dApps and transactions can scale to new heights.

HIGHLY CONFIGURABLE

Deploy various blockchain infrastructures to fit your dApp's needs. Your code, your choices.

FEATURES CONT.

SECURED ACCESS SHARDS

Revolutionizing Security

Our unique sharding approach ensures unmatched protection and efficiency. Experience the new era of secure blockchain transactions with Miami's secured access shards.

BRC-20 INTEROPERABILITY

Seamless Integration

Miami's blockchain is fully compatible with BRC-20 standards, fostering a diverse and interconnected crypto ecosystem. Unleash the potential of cross-token operability and fluidity.

DEPLOYMENT ON MRC-20 (ERC-20)

Introducing MRC-20

Miami's pioneering standard, MRC-20, is set to redefine blockchain functionality. Tailored for ultimate performance, it's not just a standard; it's the Miami Vibe brought to blockchain technology. Deploy with MRC-20 and vibe with innovation.

POWERED BY \$VIBE

THE SECRET ENERGY IN THE
THRIVING ECOSYSTEM

THE VIBE TOKEN IS USED FOR:

- 📄 Deploying Smart Contracts
- 💸 Transaction Fees
- 🛡️ Protocol Security
- 🌀 Staking & More (New Iterations)

TEAM

Miami's Testnet is live and fully functional now. The team invites everyone to explore and play before mainnet launch. As a decentralized, open-source blockchain, users can keep up-to-date and even contribute to the codebase on GitHub.

The Miami team embodies the spirit of true Vice Cops - A team that keeps a low profile but produces groundbreaking innovation. Rather than seeking fame, they prefer to let their work speak for itself. True Vice Cops stay undercover and people only know them by their work.

The team has decades of experience in blockchain, business, and artificial intelligence. The team members are highly skilled and possess years of professional experience as machine learning engineers, data scientists, artificial intelligence consultants, and automated robotics developers. They have worked with Fortune 500 companies and individuals with PhD-level academic backgrounds in the field of AI. And they have been part of some revolutionary Web3 projects in the past as well.

DISCLAIMER & TERMS

You must be aware that the Miami token is the utility token that runs the Miami blockchain. It is not to be considered a security or investment or financial instrument, as you may lose some or all of your funds by purchasing it. Miami is a decentralized, open source, research experiment to push the boundaries of blockchain technology. It is inherently risky.

Users from the United States, European Union, Canada, UK, China, Singapore, Hong Kong, Iran, North Korea, and Afghanistan are prohibited from participating in the initial phases of Miami launch.

Inadequate disclosure of information : As at the date hereof, the Miami Network is still under development and its design concepts, consensus mechanisms, algorithms, codes, and other technical details and parameters may be constantly and frequently updated and changed. Although this white paper contains the most current information relating to the Miami Network, it is not absolutely complete and may still be adjusted and updated by the Miami Development team from time to time. The Miami Development team has no ability and obligation to keep holders of Miami Token informed of every detail (including development progress and expected milestones) regarding the project to develop the Miami Network, hence insufficient information disclosure is inevitable and reasonable.

Failure to develop : There is the risk that the development of the Miami Network will not be executed or implemented as planned, for a variety of reasons, including without limitation the event of a decline in the prices of any digital asset, virtual currency or Miami Token, unforeseen technical difficulties, and shortage of development funds for activities.
